Instructions for connecting to the Baruch College Wireless Network for Students, Faculty and Staff
iOS (iPhone) Guide

Baruch College offers a convenient; secure way for Students, Faculty and Staff to connect their wireless devices to our general wireless network. This guide will describe how you can connect your iPhone to the Baruch-WiFi access point in a step-by-step manner.

Requirements:

Apple iPhone with the most recent iOS software update installed

**Step 1:** Go to your phone settings via the Settings icon. Make sure your wireless is turned on and is showing all available networks.
If you are in range of a wireless access point while on campus, you will see the access point listed as “Baruch-WiFi” as a choice.
Step 2: Select “Baruch-WiFi” from the list of available access points. Once selected, you will see your device establish a connection to our wireless network.

Once the checkmark appears, you will still need to use a web browser to authenticate with your Baruch Username credentials before being allowed to access the internet.
Step 3: Open the safari web browser and attempt to navigate to any webpage. DO NOT TRY AND ENTER A TERM IN THE SEARCH FIELD AS THIS WILL NOT WORK; You MUST try to navigate to a regular website, such as yahoo.com or apple.com.

Step 4: Once the authentication page appears, please enter your username and your password. For students, you will use your Baruch Username. If you are Faculty and/or Staff you will use your network/email username and password. Select “Login.”
**Step 5:** If the information you entered is correct, you will be redirected to the Baruch College Home Page, as seen below:

You are now connected and may begin navigating to the web page of your choice.

**Please note:** If your password is incorrect, you will not be told this when attempting to login on our authentication page. You will be brought back to the login page to try your login information again. Please make sure your username and password is correct when logging into the wireless. This can be done by visiting any of our student computing labs (for students) or using your personal workstation (faculty and staff) and logging in successfully.

*If you have any problems, please do not hesitate to contact the [Baruch College Computing & Technology Help Desk](#) for assistance.*
